

HEY-SIGN mural design Relief.

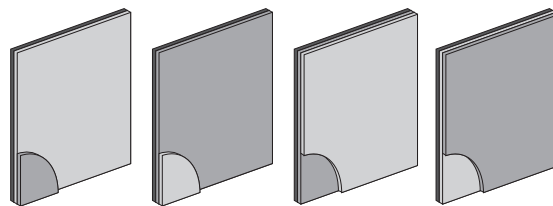

Start-up support for the product configurator.

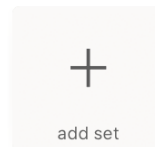

Five basic shapes with counter shapes form the basis of the mural design Relief where quarter circles with varying sizes are placed on a quadrate.

Each single tile is 40 × 40 cm and consists of a 3 mm felt layer whereon a circle segment is fixed as a second layer. A cork layer with a self-adhesive film serves as a base. That's how the tiles can be easily fixed on a smooth ground. This structure is particularly suited for sound absorption and is easily applicable in private as well as public spaces.

Each basic motive is available as 4-pcs set and the arrangement of the layers and shapes of each set is different. The example shown here is set 1. Add tile sets by clicking on the button below all sets.

Remove tile sets from your materials list and thus from your design by using the cross on the top right of each set.

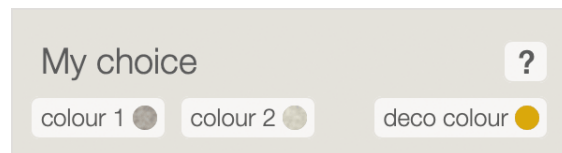

Select the desired tile from the materials list on the right. The tick shows which tile has already been added to your desktop. This example shows that the fourth tile of set 1 hasn't been used before. The blue border on the desktop shows the selected tile which can be edited.

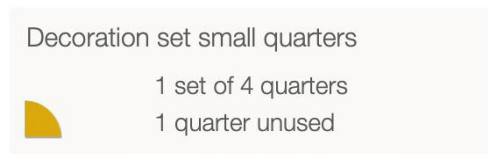

Move the tiles by clicking on the outer arrows. A rotation takes place by the center arrow. The cross deletes the tile. You will see that the tick of the materials list disappears as well. Click on an empty field to add a tile from the materials list to your desktop.

The best way to replace a tile is to use the delete function of the blue border within your design. The best way to move the tile within your design is to use the white fields. Remove the blue border from your design by clicking on an empty field of your desktop.

Above the materials list you will find the colour selection for the two possible colours of the tiles. By clicking you can select the colour of the complete HEY-SIGN range. You will also be able to define a decorative colour to create delightful accents. These quarter circles in two sizes are available in sets of 4 as well.

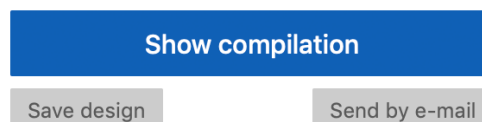

To keep the overview of all used quarter circles or decoration sets, these are displayed below the tile sets.

By clicking on the quarter circle inside the blue border, decorative elements can be placed or removed.

If you want to cancel or restore a step, use the forward and back arrows at the top right of your workspace.

Beneath the materials list you have the opportunity to generate a clear compilation of the actual version in order to print, to save or to send. A lot of fun with your personal mural design Relief!
